

Are you in need of health care?

Assistance is available for those who meet eligibility guidelines

It can be challenging to find health care resources in the community.

Do you need help?

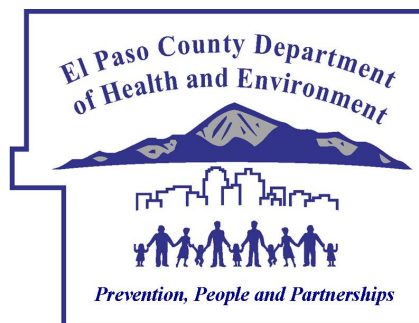

1. Are you without health insurance?
2. Are you 18 years of age or older?
3. Is your monthly income at or below 200 percent of federal poverty guidelines? (guidelines on reverse side)

If you answer yes to all three questions, you may meet eligibility guidelines to receive health care assistance.
