

# How to help businesses thrive during COVID-19

*We all have to work together to protect our economy during COVID-19. Customers can help businesses thrive by taking smart steps to prevent the spread of COVID-19 and help businesses stay safe.*

## Wear a mask.

Masks are required in indoor public spaces and should also be worn when in close proximity with others. Masks limit the spread of COVID-19, keeping you and others safe and helping businesses stay open.

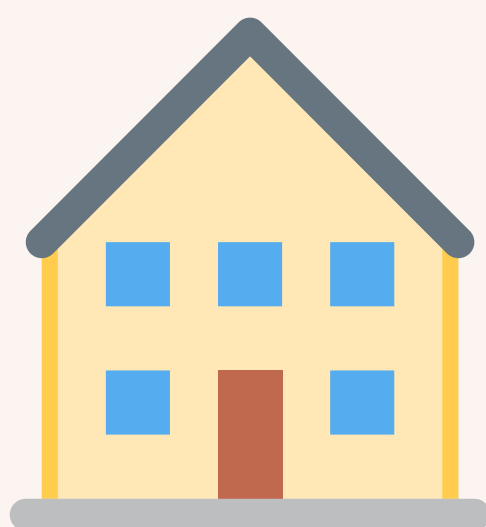

## Wash your hands.

Practice good hand hygiene by washing your hands frequently with soap and water; if soap and water isn't available, use an alcohol-based hand sanitizer before you enter a business and after you leave. Encourage businesses to provide hand sanitizer.

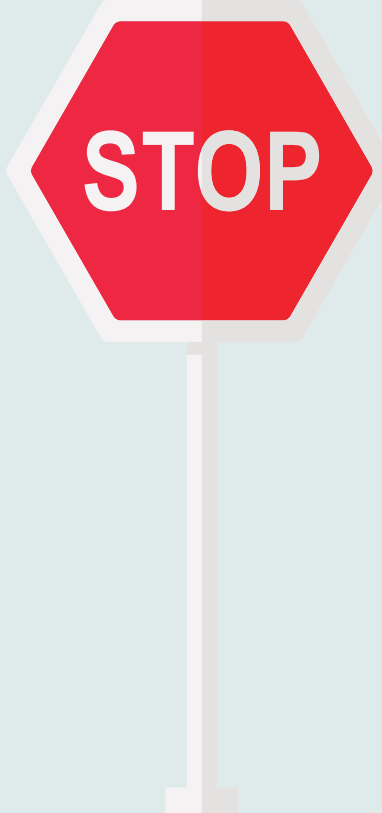

## Limit your outings.

Ask yourself if making a trip is necessary. Could you order take-out, delivery or curbside pick-up? If the trip is necessary, make a list and get all the things you need at once.

## Look for signs.

Look for signs and markers showing you where to stand in line, which way to go down aisles, and reminding you to wear a mask. Thank management for placing clear signs and encourage more public health signage where needed.

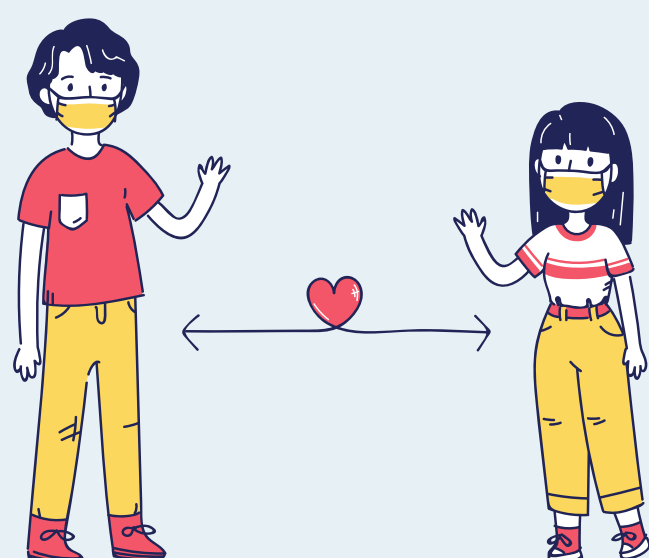

## Only hang with your crew.

As much as possible, limit interactions to your family and those close friends that you spend the most time with.

## Practice social distancing.

Maintain at least 6 feet of distance from others.

## Remember that businesses and workers depend on you.

By helping limit the spread of COVID-19, you are keeping businesses open and workers employed.
