INTERNATIONAL TRAVEL CLINIC

A Pre-travel Consultation and Immunization Service

Prevent • Promote • Protect

TRAVEL HEALTHY: Protect Yourself from Disease

Traveling to other countries often brings increased risk of infectious diseases, even when staying in first-class accommodations. Some of these diseases can last weeks or months, and some are potentially fatal.

Preventive measures such as vaccination can protect travelers from risks that might ruin a vacation or business trip. Health care abroad may be limited. Such measures also protect your family, your co-workers and your community from threats that are only a plane ride away.

El Paso County Public Health's International Travel Clinic helps travelers prevent illness, enjoy their travels and return home in good health.

THE TRAVEL CONSULTATION

Travel consultation services are provided by public health nurses and begin with a review of your vaccination and brief health history.

Your consultation may include:

- Required, recommended and U.S. "routine" immunizations
- Personal assistance determining which vaccines and why
- Specific advice about health risks based on itinerary and activities
- Education about food, beverage and insect safety
- Assistance in determining malaria risk and prevention medications (anti-malarial medication must be prescribed by health care providers outside of Public Health)
- U.S. State Department advisories

PLAN AHEAD

Many vaccines take two or more weeks to become effective. It is important to call for an appointment as soon as you know when and where you will be traveling. Special situations such as pregnancy, heart or other health conditions also may require consulting with your regular medical care provider.

COST OF SERVICES

A clinic fee of \$60 includes a 30-minute consultation as well as take-home materials; vaccines are an additional cost. Vaccine prices depend on El Paso County Public Health's purchase cost. For a list of current prices, visit our website: www.elpasocountyhealth.org. We accept Mastercard, Visa, checks and cash—due at time of visit. We cannot accept insurance, but costs may be reimbursable.
